Cole-Parmer® Modular Dry Block Heaters

HEAT YOUR SAMPLES QUICKLY AND UNIFORMLY

Cole-Parmer dry block heaters provide safe dry heat for a wide variety of clinical and general chemistry applications. The modular design, requiring removable heating blocks, offers precise temperature control with uniform heat distribution, ensuring reproducibility of results and eliminating the possibility of costly heater burn-out.

Purchase a complete system by selecting an analog or digital heater unit along with one or more interchangeable heating block modules to accommodate your particular variety of sample tube size requirements.

FEATURES

- Multiple heating block configurations allow you to easily customize based on your various test tube sizes
- Chemical-resistant, powder-coated steel body construction makes it easy to handle sample spills for quick cleanup time
- New compact design saves you valuable bench space

ANALOG DRY BLOCK HEATERS PROVIDE AN ECONOMICAL ALTERNATIVE

- Easy to use—simply insert sample tubes in block, read your thermometer, and adjust the knob controller to the desired temperature set point
- Bimetallic, dual-thermostat technology ensures precise control over the two most common ranges: from slightly above ambient to 60°C, and from 50 to 130°C

DIGITAL BLOCK HEATERS OFFER PRECISION CONTROL FOR REPRODUCIBLE RESULTS

- Digital heaters feature a proportional-integrative-derivative (PID) microprocessor controller with digital temperature set points and an easy-to-read LED display, providing precise temperature control of test samples
- Unique, built-in temperature sensing probe for greater temperature accuracy and uniform heating
- Temperature set point adjustments are easy to manage and can be set in 0.1° increments

INTERCHANGEABLE BLOCKS OPTIMIZE HEAT TRANSFER FOR UNIFORMITY AND ACCURACY

- Versatile blocks allow the use of multiple tube sizes
- Anodized aluminum construction provides greater heat retention
- Eliminate burns and accidental spills with the included block extractor
- Each block features a thermometer well to ensure accurate block temperature readings
