

Cole-Parmer® 1-Way Stopcocks

Gamma-Stable Polycarbonate

Cole-Parmer®

Add a stopcock to your system for easy on/off control of your fluid. The handle provides a quick visual check of whether the valve is open or closed. Stopcocks feature luer fittings, making it easy to create a quick leak-free connection. Manufactured from high-performance thermoplastic, DEHP-free, and RoHS compliant, gamma-stable polycarbonate stopcocks are ideal for applications requiring biocompatibility and stability to gamma irradiation.

APPLICATIONS

- Perfect for titrations, chromatography, and cooling circuits
- Ideal for general-purpose, laboratory, and single-use applications

FEATURES/BENEFITS

- Stopcocks provide accurate, leak-free flow control
- Handles rotate a full 360°
- Sterilize via EtO or gamma irradiation
- Transparent polycarbonate lets you easily view fluid flow
- Specially formulated to exhibit excellent biocompatibility and stability to gamma irradiation
- Conforms to ISO 594-1 and 594-2 standards
- Free technical application support available to assist with product selection
