

# World New Innovation

Water activity measurement instrument

NOVASINA is the leader since more than 30 YEARS of precision **WATER ACTIVITY** measurement systems in foodstuff as well as drugs, chemical products and cosmetics. Best "Swiss quality" thanks experience, research and development

a<sub>w</sub>

## Advantages:

- ↳ Precise measurement
- ↳ Worldwide unique "Novalyte" measurement technology
- ↳ Highest reliability and long term stability
- ↳ Simple to use and handle
- ↳ Intuitive menu structure
- ↳ High precision temperature controll chamber
- ↳ Built in "pre-conditioning chamber"
- ↳ Large-scale display, backlit
- ↳ 7 point Factory calibration
- ↳ Checking, testing and re-adjusting with SAL-T humidity standards
- ↳ Modular design
- ↳ Software updates possible at any time
- ↳ Easy on site service possibilities

**N**ovasina AG is proud to present its newest product for water activity measurement.

The **LabMASTER-aw** and **LabPARTNER-aw** product series impress with their unique accuracy, reproducibility, robustness and modularity.

With that the new system is setting new standards and fulfils already today the regulations and recommendations of international commissions regarding traceability and safety.

The **LabMASTER-aw** is available in three versions and can control up to **9 LabPARTNER-aw** by a electronic bus-system. Thanks to a clever software design updates can be easily performed at any time.
