

Cole-Parmer® 4-Way Stopcocks

Polycarbonate

Cole-Parmer®

Stopcocks provide easy on/off control of your fluid. Four-way stopcocks feature two female Luer fittings and a male Luer fitting with or without a lock. Luer fittings on stopcocks ensure a quick, leak-free connection. Simply turn the handle to a port you want closed, while the other two ports remain open. Turn the handle to the side without a port for fluid flow through all three remaining ports simultaneously. Stopcocks are made of a polyethylene rotor and a transparent polycarbonate body.

Scan the QR code for more information on stopcocks.

WARNING: This product is not approved or intended for, and should not be used for, medical, clinical, surgical, or other patient-oriented applications.

APPLICATIONS

- In-line analysis, waste and media distribution, and sample mixing
- Ideal for general-purpose, laboratory, and single-use applications

FEATURES/BENEFITS

- Consistent inside diameter minimizes turbulence and bubble entrapment
- Handle points to “off” port
- Use with both liquids and gases
- DEHP free (non-DEHP)
- Transparent polycarbonate body makes it easy to see the flow
- Sterilize via ethylene oxide (EtO)
