

# Tee Fittings

**EQUAL TEES | REDUCTION TEES**  
**THREADED TEES | BRITISH THREADED TEES**

Eldon James offers PVC-free tee fittings and connectors that are safer, tougher, and better than their plastic alternatives.

All Eldon James connectors and tubing are PVC-free, DEHP/BPA-free, and we offer antimicrobial fittings for the critical applications to protect against the threat of bacteria and biofilm formation.

Great for use across many industries, including the beverage, food, medical, industrial and automotive areas, our tee fittings are available from 1/16" to 1" barb to custom fit your needs. British threaded tee fittings are also available and our connectors are compatible with many metric sized hoses and tubes.

Eldon James has further revolutionized the tee fitting industry through our innovative single barb fitting style which offers unmatched benefits, including:

- A single barb design with no mold parting line, which prevents the "leak path" created by parting lines on typical barb connectors.
- An anti-rotation device located on the barb shaft prevents the tubing from rotating or twisting on the tee fitting.
- Clean, functional design has no protruding sharp edges, boxed corners, or excess material that can be detrimental to tubing.

## **ABOUT OUR NATURAL MATERIALS:**

All Cleanroom Manufactured materials are ISO Class 7. *All QC items in this section are available as a Special Order.*

### **Medical Nylon (MN)**

Nylon, which exhibits excellent tensile strength with moderate stiffness and high impact resistance. Great for medical uses to connect multiple tubes with fuels, lubricants, and many other chemicals.

### **Natural Nylon (NN)**

Natural Nylon exhibits excellent tensile strength with moderate stiffness and high impact resistance. Great for automotive and industrial use with fuels, lubricants, and many chemicals.

### **Natural Kynar® 740 (NK7)**

Offers excellent chemical resistance, inherent flame resistance, high gamma radiation resistance, good UV and weather resistance, good mechanical properties, low moisture absorption and good machinability.

### **Polypropylene (PP)**

Polypropylene is a very versatile material and formulated for biomedical and bioprocess applications. It is radiation stable and is resistant to solvents, chemicals, water and other inorganic environments.

**ELDON JAMES' FITTINGS ARE EMPLOYED ACROSS MANY INDUSTRIES, INCLUDING BEVERAGE, FOOD, MEDICAL, INDUSTRIAL AND AUTOMOTIVE.**
