

TWIN TUBE™ & SIXTUBE™ SERIES CONNECTOR

The Twin Tube™ coupling

provides one easy-to-use quick disconnect for two separate fluid lines. The non-valved Twin Tube maintains two individual flow paths in one coupling. Featuring the CPC thumb latch, the Twin Tube can disconnect two lines with the push of a button. The panel mount design keeps a low profile on the front of the equipment panel.

- Sixtube insert is keyed to body → Ensures correct line orientation
- Free coupling rotation (Twin Tube) → Eliminates kinked tubing
- CPC thumb latch → One-hand connection and disconnection

BENEFITS

These graphs are intended to give you a general idea of the performance capabilities of each product line. The shaded area of each graph represents the operating range of the product family, i.e., upper and lower values are shown. Therefore, depending on the exact coupling configurations selected, you can reasonably expect values to fall within the shaded area.
