Thank you for purchasing the Cole-Parmer ultrasonic cleaner. Please take the time to read these operating instructions before use and retain them for future reference. Failure to follow these instructions may lead to serious personal injury and damage to property.

FEATURES

- Normal and soft power control.
- Degas function for increase the cleaning effect.
- Automatically ultrasonic frequency tracking.
- User-friendly and clear panel.
- Memory function.
- LED display for temperature and timer.
- High-performance transducers.
- Patent products.

WARNING: Strong acid or alkaline cleaning solution will cause corrosion, rust and even puncture of tank or machine body. To overcome this problem, dilute to mild PH solution or request for tank made of specific grade of stainless steel like SUS304.

After the cleaning process is finished, unplug the power cord, open the lid and remove the object. Finally, pour out the water after cooling. Clean and wipe the tank. Keep the drainage valve closed. (for 6L and above units).
INTRODUCTION

Ultrasonic cleaning is based on the cavitation effect caused by high frequency ultrasonic wave vibration signal in the fluid. Microscopic bubbles are formed, and they implose violently causing the cavitation which create an intense scrubbing action on the surface of the item being cleaned. The bubbles are small enough to penetrate microscopic crevices, cleaning them thoroughly and consistently. Ultrasonic cleaning is extremely effective at removing dirt and grime which would normally require tedious manual cleaning by hand. It has been used to clean a wide variety of instruments and mechanical parts such as carburetors, returning them to almost “like new” condition without damage to delicate parts.

PREPARATION:

1. Carefully unpack the cleaner and remove all traces of packing materials from it. Visually inspect the cleaner for any parts that may have become loose or damaged during transit.

   Contents:
   a: Main machine  
   b: Soundproof lid  
   c: Power cord  
   d: Outlet filter  
   e: Mesh basket  
   f: User manual

2. Place the cleaner on a flat, clean surface where the cooling fans will receive adequate ventilation and ensure all controls are set to off. Also ensure the drain tap is in the closed position.

3. Ensure the power cord is securely plugged into the cleaner and that no part is likely to come into contact with moisture.

4. Carefully fill at least ½ of the tank with a solvent solution. For demanding cleaning we recommend a small amount of washing up liquid, this will help increase the cleaning performance. The cleaner is now ready for use.

Attention

While the machine is working normally, ultrasonic and tank syntony gives a well-proportioned sound, and no shudder on the surface of the water, yet there is spray made by the tiny bubbles. If there are discontinuous surges, please add or release a little of washing solution in the tank, stopping the surges is better for the objects cleaning.

 Heating

2. When setting the temperature, if the setting temperature exceed the environment temperature, press key, the heating working, and indicator on. If below environment temperature, the heating couldn’t start, and indicator turn off.

3. Heating won’t shut off automatically, if you don’t press .

4. The device with memory function and acquiesce in the temperature you setting last time.

 Degas Mode

After timer and temperature setting, press , the corresponding indicator on and the device will work in degas mode: working 6 seconds, and stop 2 seconds, then working 6 seconds, cycle like this with countdown display.

Intermittent operation of ultrasonic power for a quicker degassing of the cleaning liquid.

If you want to transfer to other mode, just press or , then the “degas” indicator turn off and indicator for “normal” or “soft” turn on; If want to stop working, press again, then both heating and ultrasonic will stop and the corresponding indicator turn off.

 Normal Mode

After timer and temperature setting, Press “Normal” key, the corresponding indicator on and the device will work in normal mode: continuously working with full ultrasonic power and countdown display.

If you want to transfer to other mode, just press or , the “normal” indicator turn off and indicator for “degas” or “soft” turn on; if you want to stop working, press again, then both heating and ultrasonic will stop and the corresponding indicator turn off.

 Soft Mode

After timer and temperature setting, press , the corresponding indicator on and the device will work in soft mode. If you want to transfer to other mode, just press or , the “soft” indicator turn off and indicator of “degas” or “normal” turn on; if you want to stop working, press again, then both heating and ultrasonic will stop and the corresponding indicator turn off.

Note: Degas, Normal and Soft cannot be operated simultaneously.
SAFETY PRECAUTIONS

⚠ Keep it away from children!

This device is not intended to use by individuals with restricted physical sensory or metal capacities or those with lack of experience or knowledge, include children, unless they are supervised by an individual who is responsible for their safety or have received training in operating the device.

⚠ Please read the following very carefully as failure to comply may invalidate your guarantee

To avoid electrical shock:

1) DO NOT run the cleaner continuously for more than one hour at a time, as doing so can damage the internal components.
2) DO NOT operate the unit without fluid in the tank. Always ensure the fluid is no higher than the max mark. Always ensure there is a minimum depth of 7cm.
3) DO NOT drop any item into the tank as this may cause damage to the transducer. Always place the items gently into the tank and use the basket whenever possible.
4) The more items that you place in your cleaning bath the less efficient it will clean. It is not advised to overlap items. Always allow plenty of clear space between the items.
5) Do keep the lid on during use. This will prevent splashes and reduce evaporation of the fluid.
6) Never immerse the machine or power cord in water or other liquid.
7) DO NOT touch the power plug with wet hands, especially when inserting or removing the plug.
8) DO NOT touch the unit if the machine has fallen into water during operation. Remove the power plug from the socket first.
9) DO NOT disassemble the machine, except by professionals.
10) UNPLUG the power source while filling or emptying the tank.
11) DO NOT spray water or liquid over the device and the control panel.
12) DO NOT operate the cleaner without proper grounding.
13) DO NOT place the device on a soft surface, where the vents could be blocked.
14) Upon completion of the cleaning cycle, turn the heater knob off and isolate the machine from the electrical supply.
15) Take care when adding or removing items from the cleaning tank as the fluid is likely to be hot and displaced fluid can damage the internal components. Any displaced fluid must be dried up immediately.

OPERATION GUIDELINES

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>Select your cleaning solution, fill at least ½ of solution into the tank. Do not exceed the filling line.</td>
</tr>
<tr>
<td></td>
<td>Note: Do not ever use alcohol, gasoline or flammable solutions. Doing so could cause a fire or explosion. Use only water-based solutions.</td>
</tr>
<tr>
<td>2.</td>
<td>Place the items into a basket, Slowly lower the basket into tank, do not allow items to contact the tank bottom (solution should cover the items).</td>
</tr>
<tr>
<td>3.</td>
<td>A: Plug the cleaner into grounded outlet.</td>
</tr>
<tr>
<td></td>
<td>B: Power on and turn on the power switch on back side of the machine.</td>
</tr>
<tr>
<td></td>
<td>Note: After the power on, the temperature you see on the machine is environment temperature. Time and temperature default as the last setting ones. (3 minutes default time for initial use)</td>
</tr>
<tr>
<td>Timer</td>
<td>Press 🔝_unlock to setting the cleaning time. When timer count down to 00:00, the ultrasonic stop working.</td>
</tr>
<tr>
<td></td>
<td>Note: The device with memory function and acquiesce in the time you setting last time.</td>
</tr>
<tr>
<td>Heating</td>
<td>Press 🔜_lock to start/stop heating. Press 🔜_lock+줍_lock to setting the temperature.</td>
</tr>
<tr>
<td></td>
<td>Note: 1. To get the best cleaning result, the solution’s temperature we suggest is 40-60℃. Warm water and dish washing liquid can soften grease and improve cleaning result.</td>
</tr>
</tbody>
</table>
16) In the event of failure/emergency, disconnect the mains supply by removing the plug from the mains socket.

**APPLICATION**

<table>
<thead>
<tr>
<th>Provided product is non-porous and can normally be immersed in water almost anything can be thoroughly cleaned. Here are some examples:</th>

**Items Not Suitable For Ultrasonic Cleaning**

- **Soft Jewelry**: Pearls, emerald, ivory, coral, Agate, sea turtle shells, etc.
- **Welded, Plated and Glued Items**: Welded or plated metal items, glued items.
- **Watches**: Except diver’s watches with depth rating over 50m (150ft).
- **Others**: Ceramic, camera filters with preexisting cracks.
