# SAFETY DATA SHEET

## Ceramic Marking Ink

### Section 1. Identification

<table>
<thead>
<tr>
<th>GHS product identifier</th>
<th>: Ceramic Marking Ink</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chemical name</td>
<td>: Marking Ink</td>
</tr>
<tr>
<td>Other means of identification</td>
<td>: Blue Marking Ink, Blue Pen Ink</td>
</tr>
<tr>
<td>Product type</td>
<td>: Liquid.</td>
</tr>
</tbody>
</table>

**Identified uses**

Not available.

**Supplier's details**

CoorsTek  
16000 Table Mountain Parkway  
Golden, CO 80403  
Phone: 303-271-7000  
Fax: 303-271-7009

**Emergency telephone number (with hours of operation)**

303-271-7000  
8am-5pm MDT (M-F)

### Section 2. Hazards identification

**OSHA/HCS status**

This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

**Classification of the substance or mixture**

- FLAMMABLE LIQUIDS - Category 3  
- ACUTE TOXICITY (oral) - Category 3  
- SKIN CORROSION/IRRITATION - Category 2  
- SERIOUS EYE DAMAGE/EYE IRRITATION - Category 2A  
- SKIN SENSITIZATION - Category 1  
- AQUATIC HAZARD (ACUTE) - Category 1  
- AQUATIC HAZARD (LONG-TERM) - Category 1

**GHS label elements**

- Hazard pictograms

**Signal word**

Danger

**Hazard statements**

- H226 - Flammable liquid and vapor.  
- H301 - Toxic if swallowed.  
- H319 - Causes serious eye irritation.  
- H315 - Causes skin irritation.  
- H317 - May cause an allergic skin reaction.  
- H410 - Very toxic to aquatic life with long lasting effects.

**Precautionary statements**

**General**

Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand.
Section 2. Hazards identification

Prevention:
- P280 - Wear protective gloves. Wear eye or face protection.
- P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
- P241 - Use explosion-proof electrical, ventilating, lighting and all material-handling equipment.
- P242 - Use only non-sparking tools.
- P243 - Take precautionary measures against static discharge.
- P233 - Keep container tightly closed.
- P273 - Avoid release to the environment.
- P261 - Avoid breathing vapor.
- P270 - Do not eat, drink or smoke when using this product.
- P264 - Wash hands thoroughly after handling.
- P272 - Contaminated work clothing should not be allowed out of the workplace.

Response:
- P391 - Collect spillage.
- P301 + P310 + P330 - IF SWALLOWED: Immediately call a POISON CENTER or physician. Rinse mouth.
- P303 + P361 + P353 - IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower.
- P302 + P352 + P362-2 - IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing.
- P333 + P313 - If skin irritation or rash occurs: Get medical attention.
- P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
- P337 + P313 - If eye irritation persists: Get medical attention.

Storage:
- P405 - Store locked up.
- P403 - Store in a well-ventilated place.
- P235 - Keep cool.

Disposal:
- P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.

Hazards not otherwise classified:
None known.

Section 3. Composition/information on ingredients

Substance/mixture: Mixture
Chemical name: Marking Ink
Other means of identification: Blue Marking Ink, Blue Pen Ink

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.
Section 4. First aid measures

Description of necessary first aid measures

**Eye contact**: Flush with tepid water for at least 15 minutes while holding eyelids open. Seek medical attention if irritation occurs.

**Inhalation**: When handling cobalt oxide to mix, wear a half-face respirator. Move to area free from risk of further exposure. Administer oxygen or artificial respiration, as needed. Get medical attention.

**Skin contact**: Wash with plenty of soap and water. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 20 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure.

**Ingestion**: Not a likely route of exposure. If large amounts of product are ingested, do not induce vomiting and seek prompt medical attention. Never give anything by mouth to an unconscious person.

Flush with tepid water for at least 15 minutes while holding eyelids open. Seek medical attention if irritation occurs.

Notes to physician:

In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

**Indication of immediate medical attention and special treatment needed, if necessary**

**Protection of first-aiders**: No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

**Notes to physician**: In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

**Specific treatments**: No specific treatment.

**Potential acute health effects**

**Eye contact**: Causes serious eye irritation.

**Inhalation**: Exposure to decomposition products may cause a health hazard. Serious effects may be delayed following exposure.

**Skin contact**: Causes skin irritation. May cause an allergic skin reaction.

**Ingestion**: Toxic if swallowed. Irritating to mouth, throat and stomach.

**Over-exposure signs/symptoms**

**Eye contact**: Adverse symptoms may include the following:
- pain or irritation
- watering
- redness

**Inhalation**: No known significant effects or critical hazards.

**Skin contact**: Adverse symptoms may include the following:
- irritation
- redness

**Ingestion**: No known significant effects or critical hazards.

**Most important symptoms/effects, acute and delayed**

**General**: Product may vaporize and cause irritation to eyes, skin, and respiratory tract. In case of chronic exposure, may cause allergic sensitization, kidney irritation, albuminuria and hematuria.

**Potential acute health effects**

**Eye contact**: Causes serious eye irritation.

**Inhalation**: Exposure to decomposition products may cause a health hazard. Serious effects may be delayed following exposure.

**Skin contact**: Causes skin irritation. May cause an allergic skin reaction.

**Ingestion**: Toxic if swallowed. Irritating to mouth, throat and stomach.

**Over-exposure signs/symptoms**

**Eye contact**: Adverse symptoms may include the following:
- pain or irritation
- watering
- redness

**Inhalation**: No known significant effects or critical hazards.

**Skin contact**: Adverse symptoms may include the following:
- irritation
- redness

**Ingestion**: No known significant effects or critical hazards.

See toxicological information (Section 11)
Section 5. Fire-fighting measures

Extinguishing media

Suitable extinguishing media

: Use dry chemical, CO₂, water spray (fog) or foam.

Unsuitable extinguishing media

: Do not use water jet or water-based fire extinguishers.

Specific hazards arising from the chemical

: Flammable liquid and vapor. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. The vapor/gas is heavier than air and will spread along the ground. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Runoff to sewer may create fire or explosion hazard. This material is very toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.

Hazardous thermal decomposition products

: Decomposition products may include the following materials:
  - carbon dioxide
  - carbon monoxide
  - nitrogen oxides
  - metal oxide/oxides

Special protective actions required for fire-fighters

: Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

Special protective equipment for fire-fighters

: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Do not breathe vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

For emergency responders

: If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

Environmental precautions

: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.

Methods and materials for containment and cleaning up

Spill

: Secure area and obtain necessary personal protective equipment. Cover spill with inert material (such as Fuller’s Earth, sand, oil adsorbent, etc.), scoop up material, and place in appropriate containers for disposal. Do not allow material to enter sewer or waterways.
Section 7. Handling and storage

Precautions for safe handling

Protective measures: Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.

Advice on general occupational hygiene: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. See also Section 8 for additional information on hygiene measures. Remove contaminated clothing and protective equipment before entering eating areas.

Conditions for safe storage, including any incompatibilities: Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

<table>
<thead>
<tr>
<th>Ingredient name</th>
<th>Exposure limits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cobalt oxide</td>
<td>ACGIH TLV (United States, 4/2014). TWA: 0.02 mg/m³, (as Co) 8 hours.</td>
</tr>
<tr>
<td></td>
<td>NIOSH REL (United States, 4/2013). TWA: 100 ppm 10 hours.</td>
</tr>
<tr>
<td></td>
<td>OSHA PEL (United States, 2/2013). TWA: 560 mg/m³ 10 hours.</td>
</tr>
<tr>
<td>Turpentine, oil</td>
<td>ACGIH TLV (United States, 6/2013). Skin sensitizer. TWA: 20 ppm 8 hours.</td>
</tr>
</tbody>
</table>

Appropriate engineering controls: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

Environmental exposure controls: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation.
Section 8. Exposure controls/personal protection

**Hygiene measures**  :  Follow good industrial hygiene practice.

**Eye/face protection**  :  Recommended: Safety glasses with side-shields or splash goggles.

**Skin protection**

**Hand protection**  :  Wear impervious gloves when handling product.

**Body protection**  :  Not required under normal conditions of use.

**Other skin protection**  :  Not required under normal conditions of use.

**Respiratory protection**  :  Not required under normal conditions of use. For air concentrations greater than the TLV, use a NIOSH/MSHA approved organic respirator with a full face piece. The evaluation of the need for respiratory protection should be determined by a professional industrial hygienist.

Section 9. Physical and chemical properties

**Appearance**

**Physical state**  :  Liquid.

**Color**  :  Black.

**Odor**  :  Turpentine.

**Odor threshold**  :  Not available.

**pH**  :  Not available.

**Melting point**  :  Not available.

**Boiling point**  :  180°C (356°F)

**Flash point**  :  Closed cup: 36°C (96.8°F)

**Evaporation rate**  :  Not available.

**Flammability (solid, gas)**  :  Not available.

**Lower and upper explosive (flammable) limits**  :  Not available.

**Vapor pressure**  :  Not available.

**Vapor density**  :  4.84 [Air = 1]

**Relative density**  :  1.5

**Solubility**  :  Insoluble in the following materials: cold water and hot water.

**Partition coefficient: n-octanol/water**  :  Not available.

**Auto-ignition temperature**  :  Not available.

**Decomposition temperature**  :  Not available.

**Viscosity**  :  Not available.

**Volatility**  :  10%

Section 10. Stability and reactivity

**Reactivity**  :  No specific test data related to reactivity available for this product or its ingredients.

**Chemical stability**  :  The product is stable.

**Possibility of hazardous reactions**  :  Under normal conditions of storage and use, hazardous reactions will not occur.
Section 10. Stability and reactivity

Conditions to avoid: Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. Do not allow vapor to accumulate in low or confined areas.

Incompatible materials: Reactive or incompatible with the following materials: oxidizing materials, reducing materials, organic materials, metals, acids, alkalis and moisture.

Hazardous decomposition products: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Information on the likely routes of exposure

Potential acute health effects

Eye contact: Causes serious eye irritation.

Inhalation: Exposure to decomposition products may cause a health hazard. Serious effects may be delayed following exposure.

Skin contact: Causes skin irritation. May cause an allergic skin reaction.

Ingestion: Toxic if swallowed. Irritating to mouth, throat and stomach.
Section 11. Toxicological information

Symptoms related to the physical, chemical and toxicological characteristics

Eye contact: Adverse symptoms may include the following:
- pain or irritation
- watering
- redness

Inhalation: No known significant effects or critical hazards.

Skin contact: Adverse symptoms may include the following:
- irritation
- redness

Ingestion: No known significant effects or critical hazards.

Delayed and immediate effects and also chronic effects from short and long term exposure

Short term exposure

Potential immediate effects: No known significant effects or critical hazards.

Potential delayed effects: No known significant effects or critical hazards.

Long term exposure

Potential immediate effects: No known significant effects or critical hazards.

Potential delayed effects: No known significant effects or critical hazards.

Potential chronic health effects

General: Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels.

Carcinogenicity: No known significant effects or critical hazards.

Mutagenicity: No known significant effects or critical hazards.

Teratogenicity: No known significant effects or critical hazards.

Developmental effects: No known significant effects or critical hazards.

Fertility effects: No known significant effects or critical hazards.

**Mobility in soil**

- Soil/water partition coefficient (K<sub>oc</sub>): Not available.

**Other adverse effects**: No known significant effects or critical hazards.

Section 13. Disposal considerations

- **Disposal methods**: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling empty containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

DOT-RQ Details: Sodium nitrite 100 lbs / 45.4 kg

Special precautions for user: Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code: Not available.

Section 15. Regulatory information

U.S. Federal regulations:
- TSCA 5(a)2 final significant new use rules: Sodium nitrite
- TSCA 8(a) CDR Exempt/Partial exemption: Not determined
- TSCA 12(b) one-time export: Sodium nitrite
- United States inventory (TSCA 8b): All components are listed or exempted.
- Clean Water Act (CWA) 311: Sodium nitrite
